KAUSTUBH SHINDE

SUMMARY

Result-oriented fresher with strong problem-solving skills and a passion for learning. Proficient in various programming languages and technologies, with a keen interest in software development. Completed a rigorous internship where I gained hands-on experience in developing and testing software applications. Eager to contribute my technical skills and knowledge to a dynamic and collaborative team.

PROJECTS

1. Newspaper Billing System (Java)

As this was a desktop application I had worked on the billing section. The main Objective of this application is to avoid time consuming paper work. Due to this application the customers were relaxed and can pay their bills through one touch from their place. In billing section their was a automated billing generation and invoice generation. Payment was usually being done through QR & Cash. Monthly Reports were being generated

2. Donation Management System (PHP)

As this was a Web Application I had worked on the Front End & Back End Simultaneously. The objective of this project is to satisfying the requirements of needy organizations through donations over the net and to help those people who seeks help from others so our project is all about designing a website showing the donation management system, to enable every person/household to donate anything easily. I majorly Worked on the Registration Pages, Home Page, Contact Page & About us Page. And at the backend Side I Worked on the Payment Gateway as I was familiar with the payment work as I had previously worked on it.

3. Student Faculty Feedback Application (Android)

As this was a Mobile Application I had worked on the Front End & Back End

EDUCATION

.
.

❖ **Master's of Computer Application**

University: Pune University

Institute: Dr. D. Y. Patil Institute of Management & Entrepreneur Development

Marks: 82.46%

Year: 2023

❖ **Bachelor's of Computer Application**

University: Pune University

Institute: Indrayani Vidya Mandir

Marks: 63%

Year: 2020

◆ **HSC/12th**

University: Maharashtra State Board, Pune

Institute: Indrayani Vidya Mandir

Marks: 54%

Year: 2017

◆ **SSC/10th**

University: Maharashtra State Board, Pune

Institute: Kantilal Shah Vidyalaya

Marks: 74.80%

Year: 2015

SKILLS

java

HTML/HTML5 &CSS

AWS

AWS Ec2 ,s3, cloud watch, RDS ,EFS, EBS,vpc, AWS auto scaling, AWS load balancer ,IAM, AWS Elastic Beanstalk

Linux

Simultaneously. In the proposed system of Student Feedback System, the registered students can simply generate a feedback anywhere and anytime providing the required details in the college. The feedback thus generated is sent to the HOD, principal, admin. This saves a lot of time and effort. The HOD and the Principal can access the feedback reports delivered to them anywhere and anytime. This portal enhances security to the feedback reports of employees. My contribution in this project was at the designing the student forms. I had also Worked on the Feedback part as well and report generation was also done through my pervious knowledge.

4. Online Academic Verification (Spring Boot)

As this was a Web Application I had worked on the Front End. Scope of this project is to avoid the time consuming process of checking all the documents of the student manually. Students work is also much easier the coming to college to submit each and every document. They can simply upload all documents on the college portal by doing their individual login. This was simple to verify a student. My role in this was doing the Front End designing for the login & Sign Up page & also worked on the student portal and also on the verification side.
